

IATA PASS

Postal Accounts Settlement System

PASS provides a unique global platform that automates and harmonizes the process of billing and settlement between airlines and postal operators.

Simplify Billing and Settlement

From billing data collection, to the issuance of standard invoices, validation of payments and facilitated settlements. PASS increases efficiency as invoices are easier to track

and reconcile, duplicates, discrepancies and disputes are reduced, which results in a higher rate of on-time payments and improved cash-flow.

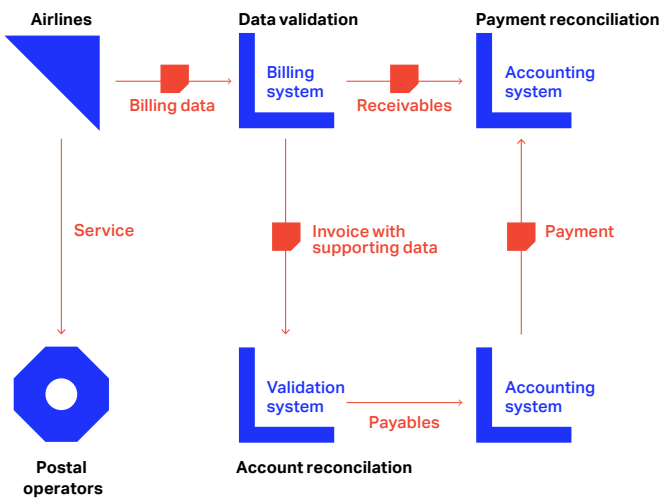

Enhance Collaboration between Airlines and Postal Operators

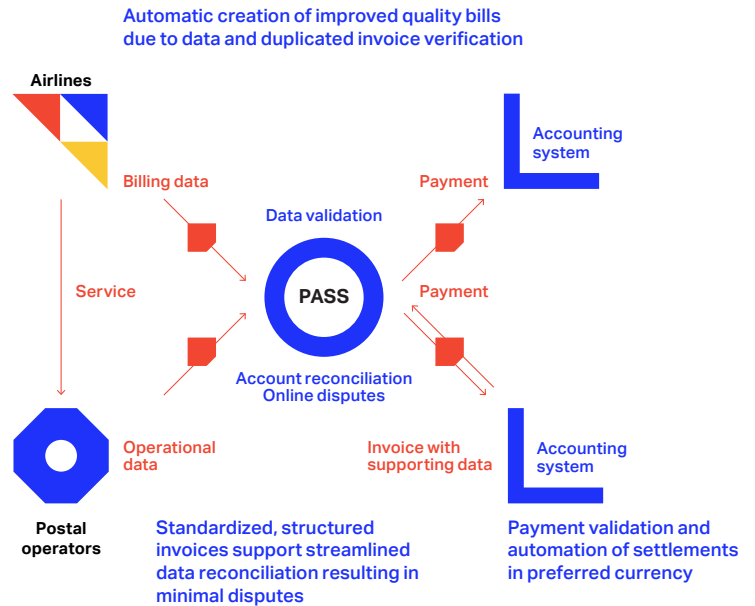

PASS supports digital technology and paperless billings and settlements with streamlined processes that reduce costs and free-up resources. PASS will replace the complex and inefficient manual procedures that exist today and which often strain business relationships. PASS enhances collaboration between airlines and postal operators.

With the expansion of e-commerce and online retail sales and the growth of consumer shipments by air, there are new and greater opportunities for airlines and postal operators to work together and strengthen their business partnerships.

Current one-to-one process

Future common platform

Key Benefits

Increased efficiency

- Standardization and automation save time in reconciliation
- Harmonized, accelerated and paperless processes support sustainability and reduce costs
- Improved quality of invoices and data (reduced discrepancies and errors)

Improved cash-flow

- Fewer disputes improve collection rates
- Streamlined payment procedures = more on-time settlements

Stronger partnerships

- Global platform with access to airlines and postal operators worldwide
- Centralized collaboration enables airlines and postal operators to connect
- Automation free up resources to expand the business

Key Features

Developed in collaboration with, and fully supported by, the Universal Postal Union (UPU), International Post Corporation (IPC) and IATA.

PASS offers:

- A global platform for billing, invoicing, dispute resolution and settlement between established business partners
- Centralized collection of billing data from airlines and operational data from postal operators
- Automated data verification
- Creation and dispatch of standardized invoices, with supporting shipment data
- Facilitated invoice reconciliation for postal operators
- Payment validation and easier settlements
- Flexibility – recognition of bilateral trading terms and conditions
